[The above is an epitome of the letter of the mayor. The original was spirited away a few seconds after it had been read. The recorder handed it to President Loof-bourow, and when that official was asked for it he said some member of the council had it. Every member of the council was interrogated, but each denied all knowledge of its possession.

Hardy moved that the action of the mayor in removing Janney, Sheets and Ecklund be confirmed. This was adopted, twing and Moran saying "No."

On motion of harriox, the comination of Samuel Paul as chief of police was confirmed, Moran's being the only "No."

Lawson wanted it referred to the police committee.

That the mayor's reference to the councilors will be resented by the entire body seems to be beyond doubt. There was no little indignation expressed by several of the members who tailed with a Henarin representative last evening, but who did not care to have the public anticipate their action in the bremises. The 'smellips comnot care to mave the public antimpate their noting in the premises. The Gas Franchise Goes Through at 30 Cents Per Thousand Feet

The Bountiful & Hot Springs Railroad amount charged to be allowed to amend their franchise for the operation of a street railway in this city in the following parties:

ulars, to-wit:

Pirst—That the word "street," where it occurs in the resolution passed December 18, 1830, he stricken out between the words "track" and "railway." that the word "dummy" also be stricken out of the same section; that sections 5 and 7 be stricken out of said resolution.

These amendments, the company said, were asked in order that it be allowed to operate an ordinary steam locomotive railway. The company said that its road was in operation as far north as Bountiful, Davis county, it passed a large number of brick yards, the product of which is used almost exclusively in this city. Application had been made to the county to build a branch line to these yards, a distance of two miles. It was new practically compete. Heretofore the brick companies have been compelied to rely for transportation on the Union Pacific and Rio Grando Wostern railwars and by said companies had been subjected to a great deal of annoyance by delay in shipment and the charge of exorbitant rates. These defects were now overcome by the petitioner's company.

Further, the petitioner's company seriously contemplates building its road westerly from the territory; but in attempting to first its bonds to secure money it constantly met the objection that its terminal facilities were not such as to warrent the proposed extension and therefore asked for the amendmonts noted.
